Community based support services for persons with Traumatic Brain Injury (TBI)
Vision

- Provide individualized, functional supports to persons with brain injury and other neurological conditions with a focus on successful transitions into their community.

- Empower persons with brain injury to maximize their independence and quality of life in their own community.
• Neuro Community Care is an independent provider of Case Management and Community Support Services.

• NCC’s functionally based services are provided in an individual’s home or community.

• NCC provides services across the country.
The Benefits of Community-Based Services:

• Real-life skill development

• Increased stabilization

• Increased independence

• Cost savings
Case Management
Acts as a bridge to help clients transition to the next phase of their lives

• In depth home assessment
• Development of individualized goals
• Collaboration
• Education for stakeholders
• Promote cost effective interventions
• Long or short term
• Advocacy
Case Management
Designed to meet the unique needs of clients focusing on relevant goal areas

- Health and wellness
- Physical and cognitive functioning
- Independent living
- Emotional regulation

- Avocational/Vocational
Community Based Services

Community Based Services provide individualized skill development for clients in their own environment

- Household management
- Meal preparation
- Budgeting
- Scheduling
- Volunteer exploration
- Cognitive skill training
- Health and wellness
Real Cost of TBI

- Loss of independence
- Low self esteem
- Isolation
- Fractured relationships
- Uncertain future
- Financial Hardship
In Conclusion

- Recovery from a brain injury lasts a lifetime.
- Community-based services decrease isolation and feelings of hopelessness.
- Ongoing community support increases quality of life.
- Community support is cost effective.
